Final Report of The First Round Math & Game Workshops for Elementary Students and Their Parents

Summer 2012

These workshops welcomed more than 1200 students from Isfahan in June 10, 2012. Every 48 students (4 groups) participated in twelve 1-hour weekly workshops. At the same time, their parents also participated in parallel workshops and learned about the same games.

The main objectives of the workshops can include:

1. To promote intuitive understanding of Mathematics of all participants (students and their parents)
2. To promote the general abilities of the students
3. To assist the parents to obtain the real understanding of mental and physical abilities of their children
4. To enrich the leisure of the children and parents
5. To create the opportunities learn mathematics using their personal abilities and interests

All the games and the tools were designed and produced by Isfahan Mathematics House.
